

Record of phone interview between Erin Berg and Exit Nurse (AMc)

13/12/2007: Message - returned her call.

Says diagnosed with cervical cancer & wishes attend an Exit workshop (had found on net).
Age 40.

* She seemed a little hesitant so delved a bit further for info & it eventuated that she stated she has a "mental, psychological condition thing" - when pressed further says she has "fragmented thinking" - when pressed further again admits that Drs thought she may have Schizophrenia but says this has not been confirmed.

Further questioning led her to admit she had had 5 breakdowns over last 10 yrs & one breakdown lasted for 2 yrs continuously.

Is on Lexapro & has been on this "for years".

Explained to her that she does not fit our criteria & Exit is unable to help her.

She then asked re getting to Mexico - told her Exit was unable to help & not something organised by Exit office –

nil further action - AMc
